RE: Resource Recovery Application, RR0180, Classification - U

Dear Mr. Gilliam:

Please consider this letter as an approval to continue resource recovery operations in accordance with, and only under the conditions specified in your previous resource recovery certification until March 1, 2000. The previous certification, RR0180, for The Norman Corporation expires today. An application for renewal has been received, but the application is not complete.

This approval for the extension of resource recovery certification activities is effective only until March 1, 2000. This extension is being provided to allow time for a complete application to be submitted. If a complete application has been received by March 1, 2000, the certification may be further extended while the application is being reviewed. As discussed in our meeting this morning, the application will be considered complete if all documents are submitted by March 1, 2000 except the scaled engineering drawing of the facility. A firm date for the submission of this drawing and an approximate drawing containing distance measurements to the property line must be part of the submission.

Please be aware that all activities at this facility must comply with other applicable state and federal regulations. If you have any questions regarding this extension or require any assistance with elements of the application, please contact Mr. Daniel A. Carey, Environmental Engineer, at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM
